Plantation	Spacing	Benefits and drawbacks
Intensive: 600-800 plants/hectare	4 x 4 m or 4 x 3 m	Choice of plants with minimal branching, pruning essential.
Intermediate: 1,100-1,500 plants/hectare	3 x 3 m or 2.5 x 3 m	
Traditional: 2,000 plants/ha	2.5 × 2.5 m	Very high-quality heavy timber. Early thinning required so more difficult to market.
